A Bride Cheats the Parson.—Some rather odd stories could be told by the man who ties the knot, did he choose to give his thoughts tongue. If the fee is \$50 or more, the groom takes great pleasure in personally transacting the business, but equally anxious in securing a substitute when a smaller price is to be paid for the union. In case he has no brother of his service, in which instance that lady is more or less officious. At a rather stylish party which occurred on Monroe street, about two months ago, the groom put a twenty-dollar gold piece in the kidded hand of his small brother-in-law, with directions for its transfer to the parson, and hurriedly left the room. The bride, hearing the conersation, succeeded in detaining the juvenile, and hunting up one of the \$5 coins her mother had given her for "traveling trifles," swapped gold pieces and called herself "just a husband and \$15 ahead." She changed her mind very shortly as to the monetary gain, for the first thing she heard as she emerged from her room in er traveling suit was, "Taint as big as groom marveled at the blushes of pretty wife as the urbane minister wished good-by and God-speed .- [Chicago Inter-Ocean.

LOCAL INTELLIGENCE.

The San Juan Colony.

The following report was yesterday submitted to the General Colony Committee by the sub-committee, consisting of Messrs.

Gallatin, Chesley, Steffens and Latham. Gallatin, Chesley, Steffens and Latham, who inspected the San Juan Grant on Parture of the owner is that Mr. Haggin Tuesday to ascertain its suitability for and Colonel Clark had an unpleasant inter colony purposes:

rolony purposes:

To the General Colony Committee—GENTLEMEN: Your committee, appointed to visit the San Juan Grant for the purpose of examining and reporting upon the eastern portion as a location for a colony, would respectfully report that on the 18th instant they, in company with Messrs. Hall, Sweetser, Williamson, Carroll, McNasser, Leonard and Clarke, visited the Grant and gave it as careful an examination as the time would permit. Their conclusions are as follows:

That a location for a successful colony must have good soil, wood for fuel, water for irrigation, and be so situated topographically that the water can be easily and cheaply carried over the whole location. They found the soil of the whole tract good. as evidenced by the tree growths, and plenty of wood for fuel. They also found that the land in the eastern portion of it will be attended with a heavy expense. The ridges that run through that portions of it will be attended with a heavy expense. The ridges that run through that portion are not continuous, but are cut through by depressions which will necessitate expensive fluming or piping. For these reasons, they conclude that the eastern portion of the Grant. They found the western part for a colony. The Butte County Murder. OBOVILLE, May 19th .- Henry Mullen, the supposed murderer of John Moore, who was found dead at Mooretown yesterday, was brought here to-day under arrest. It is believed that the object of the murder was robbery, as the money which Moore was known to have on his person was missing when the body was found, though the theory of a quarrel between Moore and his supposed murderer is also held, as they had been engaged in card playing and drinking.
